### VINIFICATION

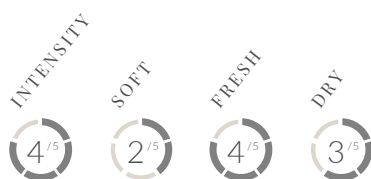

As it is intended to produce a white wine of a young character, favoring fruit and freshness, the harvest was done manually in order to obtain and select the best fruit. The grapes were destemmed in order to avoid bitter tastes, with fermentation taking place at a low temperature (13° to 15°C), in stainless steel vats, to slowly extract the most delicate aromas and flavors, having remained 1 month with fine lees, to enlarge the texture and velvety envelopment.
